DC COMMON MODE FILTER

FEATURES

- A chip-type common mode filter for large current applications.
Common mode impedance surpasses 700 Ω at 100MHz.
Noise is greatly suppressed.
- Capable of handling the highest current(up to 8A) of any chip-type common mode filter.
- Height and size have been considered ,resulting in a compact and light-weight choke coil.Applicable for the miniaturization required to reduce the size and weight of portable equipment.
- The products contain no lead and also support lead-free soldering.
- The product does not contain regulatde substances that are slated to be included in ROHS.

APPLICATIONS

Used for power line noise suppression for any electronic-devices
Used to counter adapter/battery line noise for relatively large electronic devices such as notebook PCs,stand-alone word processors, etc
